

## Illuminated smoke and fire detector (DDFI20)

This smoke detector is equipped with a sound and flash system that activate when smoke is detected. The alert is sent to all Jenile vibrating and light receivers in the home: the corresponding color code is red and the vibrations are fast.

It is specially designed for the deaf and hard of hearing, it is the only smoke detector equipped with a warning flash indicating that the batteries must be changed.

A standard smoke detector does not protect a deaf person who cannot hear the fire alarm.

## Technical Specifications
